

Wife & Mom of 2 Girls

Local Business Owner

Avid Skier & Hiker

Cancer Fighter!

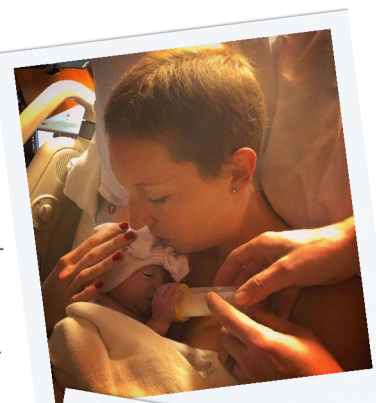

**2018** Diagnosed with breast cancer while 4 weeks pregnant. Initially told to abort, Lauren said "no," found an innovative Oncologist, delivered a healthy baby (now 7 years old) **AND** reached remission with chemo, radiation, and 9 surgeries.

**2021** Had a 2nd post-chemo miracle baby, becoming a happy, Cancer-free mother of two!

**2023** Diagnosed with Stage IV metastatic breast cancer, having spread to her bones and liver.

**2024** Conventional medicine told Lauren that there is no cure. Determined to raise her 3 and 7 year old daughters, she does not accept her prognosis!

**2025** After 2 years of aggressive research, Lauren started a breakthrough direct injection immunotherapy treatment at the Williams Cancer Institute (not covered by health insurance), and **IT IS WORKING!**

## Help Lauren continue this innovative & effective treatment.

The advanced immunotherapy teaches the immune system to recognize and target cancer cells, and gives Lauren a chance to stay alive longer to raise her 2 young girls and live a fulfilling life with her family and friends.

Lauren wants to get results, then amplify them to show others that Stage IV can be beat. She's on a mission to save not only herself, but others facing similar diagnosis.

**How many mothers, fathers, brothers, and friends can we save together?**

**\$7,000/mo**  
Regimen of well-researched integrative treatments

**\$400,000**
